

Measurement Made Easy

LASER DISTANCE METER

DM15

The **Datum DM15 Laser Distance Meter** is one of the smallest and compact laser distance meters on the market. This pocket sized survey measurement instrument consists of a lightweight design and extremely simple one button operation for instant distance measurement, simplicity itself, just point, press and measure.

The DM15 is switchable between either metric or imperial unit measure modes and has single distance or continuous tracking modes all at a touch of a button.

No changing of batteries with this unit as it is USB rechargeable and is supplied with a USB charging cable and wrist strap. The Datum DM15 Laser Distance Meter carries a 12 Month RTB Warranty.
