

Measurement Made Easy

LASER DISTANCE METER

DM40

The **Datum DM40 Distance Meter** is the ideal professional distance measurement device, with minimal functions for the simple task of interior linear distance measurement for distances up to 40 metres.

Using the DM40 couldn't be easier as anyone can measure distances with simplicity at a press of one button. An additional button to measure and calculate areas and volumes is available on the DM40 model for the users benefit, the device allows the user to change between metric and imperial units, along with the option to select the tracking mode quickly and precisely by the one button operation, all to an accuracy of $\pm 3\text{mm}$ and a crystal LCD screen displaying to a unit of 1mm.

Whether you are a building surveyor, carpenter, kitchen designer or DIY enthusiast this compact laser distance meter will fulfil all your simple distance measuring needs. The Datum DM40 carries a 12 Month RTB Warranty.
