

Measurement Made Easy

CROSS LINE LASER

DPL360

If you're looking for a versatile cross line laser, the **Datum DPL360** combines all the functions you need for indoor/outdoor projects in one compact package. With its extremely bright, sharp laser lines, the DPL360 can be used in horizontal and vertical modes with full 360 degree and 90 degree reference lines to work to. This 360 degree line laser comes with a pulse laser detector for using it in pulsed mode and features a switch to lock the laser pendulum in place for use in manual mode.
