

Measurement Made Easy

# LASER DISTANCE METER

## DM20

The **Datum DM20 Laser Distance Meter** is the ideal professional distance measurement device, with minimal functions for the simple task of interior linear distance measurement for distances up to 20 metres.

Using the DM20 couldn't be easier as anyone can measure distances with simplicity at press of one button.

This user-friendly survey measuring instrument automatically measures and calculates areas and volumes, changes between metric and imperial along with the option to select the tracking mode quickly and precisely by the touch of a button, all to an accuracy of  $\pm 3\text{mm}$  and a crystal LCD screen display of 1mm.

Whether you are a building surveyor, carpenter, kitchen designer or DIY enthusiast this compact laser distance meter will fulfil all your simple distance measuring needs. The Datum DM20 carries a 12 Month RTB Warranty.
